

Better understand the complete patient journey with closed claims data

PatientSourceComplete is Symphony Health's tokenized closed claims dataset offering longitudinal¹ patient centric data drawn from diverse managed care payer types. PatientSourceComplete creates a closed claims dataset highly representative of the US population within the payment type and is appropriate for patient analytics across oncology, specialty, rare disease, as well as chronic markets.

What are closed claims?

Closed claims are derived directly from resolved claims with a patient's insurance provider and capture nearly all patient healthcare activity during their enrolment period. This unbroken view of the patient empowers precise analysis.

Key closed claims data elements

Claim

- Claim type (professional/institutional)
- Place of service
- Service dates
- Admission / Discharge date
- Proxy cost data

Provider

- NPI
- Address
- Provider taxonomy/specialty
- Facility/institution type

Patient/Subscriber

- Unique patient ID
- Birth year, gender, state, Zip3
- Insurance type (primary)
- ACA indicators
- Enrolment period

Diagnosis/Procedure

- Dx codes
- Procedure codes
- DRG
- NDC (on Rx)
- HCPCS

1. Maximum amount of history provided at any one time is seven (7) years.

2. Data agent license not required

3. 10/1/2018-9/30/2023

Benefits of PatientSourceComplete™

01 Nationally representative dataset

Diversity of plan types spans commercial, managed Medicare, and managed Medicaid, empowering users to follow patients as they progress through life, and probe into diverse socioeconomic populations. This helps overcome the limitations inherent in "commercial only" sources.

02 Continuum of care

Includes the entire continuum of care for a patient during the period in which they are enrolled: medical services, pharmacy claims, ER visits, inpatient admissions, outpatient procedures, and anything else that flows through their insurance plan.

03 External linking

Ability to flexibly create custom de-identified datasets by linking source data with other Symphony datasets, via the Synoma® token.

04 Enhance market access

Define value messages and develop evidence supporting enhanced payer positioning. Maximize favorable access to therapy for appropriate patients who benefit from your treatment.

Empower your organization today

Learn more about how our datasets can benefit your organization and drive positive outcomes in patient care and innovation. Unlock the potential of data-driven decision-making with PatientSourceComplete.

HealthVerity powers the nation's largest real-world data ecosystem, helping life sciences organizations access and connect claims, lab, EHR and consumer data in a privacy-compliant environment. Following the acquisition of Symphony Health, HealthVerity offers the industry's most comprehensive real-world data ecosystem. Learn more at healthverity.com
