Key advantages

- ✓ **Unmatched volume**
Access the largest collections of closed payer claims, EMR, chargemaster and lab results data.
- ✓ **HIPAA compliance**
Combine de-identified, interoperable datasets to build custom and novel intersections.
- ✓ **Your data + third-party data**
Enable the universal HealthVerity ID token (HVID) to enrich your existing data with more than 150 billion healthcare transactions.
- ✓ **Data transparency**
Leverage transaction-level data to run analytics on your platform of choice.

Unique datasets

Easily Overlay Your Own Data in HealthVerity Marketplace

Instantly overlay the data you already have with the HealthVerity Marketplace ecosystem of 330 million unique patients to strengthen and enrich your data services. Multiple tiles can be created and accessed by individual teams, customers, or designations within and beyond your enterprise.

Comprehensive search criteria include:

- ✓ Disease category (ICD codes)
- ✓ Procedure Code (CPT)
- ✓ Lab (LOINC)
- ✓ Demographics (age, gender, etc)

HealthVerity supports searching against ICD9, ICD10, NDC, CPT, HCPCS, LOINC, and ICD10 procedure codes. The search bar also allows for common names of diagnosis, diseases, procedures, or drugs.

Simplify Process and Speed Access to Research-Ready Data

Working with HealthVerity means the simplicity of one vendor, one contract, and data normalized into one master dataset.

About HealthVerity

Pharmaceutical manufacturers, payers, and government organizations have partnered with HealthVerity to solve some of their most complicated use cases through transformative technologies and real-world data infrastructure. The HealthVerity IPGE platform, based on the foundational elements of Identity, Privacy, Governance, and Exchange, enables the discovery of real-world data across the broadest healthcare data ecosystem, the building of more complete and accurate patient journeys and the ability to power best-in-class analytics and applications with flexibility and ease. Together with our partners, HealthVerity has built the modern way to data for the health insights economy.
