

CLOSED PAYER CLAIMS

Sync Big

Explore the largest ecosystem of closed payer claims data to bring the patient journey to life

Closed payer claims, derived from insurance providers, offer a wealth of data that can reveal valuable information about the patient journey. Representing both medical and pharmacy transactions, closed payer claims capture nearly all interactions a patient has within the healthcare system and include information such as ICD-10 and CPT codes and physician and geographic details, painting an expansive picture of the patient's experience.

Advance the science with research-ready, real-world data

With the nation's largest healthcare and consumer data ecosystem, HealthVerity has closed claims for over 240 million patients from more than 150 unique payers, providing full transparency and provenance for how the data is sourced. This de-identified, HIPAA-compliant and research-ready data includes commercial, Medicaid and Medicare claims, unlocking infinite insights and reducing gaps in the patient journey. Additionally, we were recently selected as the first Preferred Data Partner for Inovalon, the industry's largest primary source de-identified healthcare dataset, proving our commitment to data governance, compliance and oversight.

150+ **240M+**
UNIQUE PAYERS **PATIENTS**

KEY BENEFITS:

Broad coverage of closed payer claims data, representing 72% of U.S. lives

De-identified, HIPAA compliant and research ready

Includes commercial, Managed Medicaid and Medicare Advantage claims

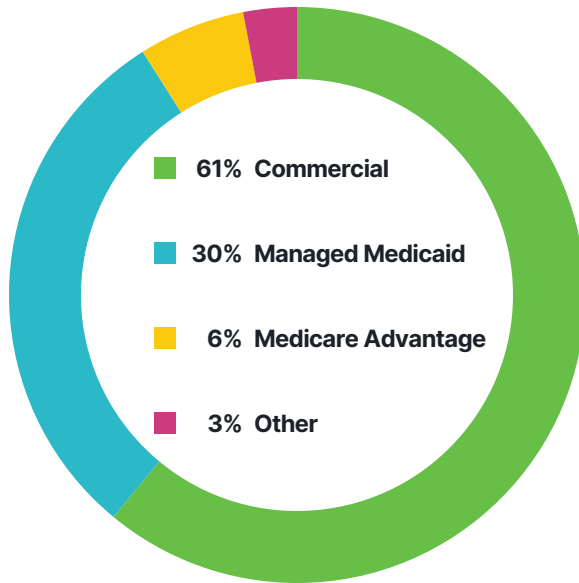

Represents all 50 states, Washington D.C. and Puerto Rico

Available history back to 2012

License only what you need

The HealthVerity Marketplace® allows you to search this unrivaled volume of de-identified payer claims and license only the data you need by state, plan, eligibility reason, National Provider Identifier (NPI) and more, activating your data strategy in a way that's never been possible before.

Significant Medicaid representation

These closed payer claims represent the most substantial collection of Medicaid patient data available in the market today. It includes program eligibility reasons, such as dual-eligibility, family care, Children's Health Insurance Program (CHIP), special needs, self-insured, low income and all others.

Synchronize with an open data ecosystem

Closed payer claims data is interoperable with the nation's largest healthcare and consumer data ecosystem. Additionally, by leveraging our advanced patient matching and identity resolution technology, you can synchronize your primary data or any other third-party data source for a more comprehensive view of the patient journey.

Synced data for a variety of use cases

Patient Journey: Gain insight into a more comprehensive patient journey, including nearly all events that occur during the enrollment period.

Real-world evidence: Generate evidence leveraging real-world data to answer questions, from burden of disease to comparative effectiveness.

Physician segmentation: Access NPI information and geography details to optimize clinical trials and strengthen physician segmentation.

Market access: Enable health economics and outcomes research (HEOR) studies, insight and models to evaluate cost of care, cost effectiveness and patient outcomes.
